

# Viewing Infectious Diseases From Different Perspectives

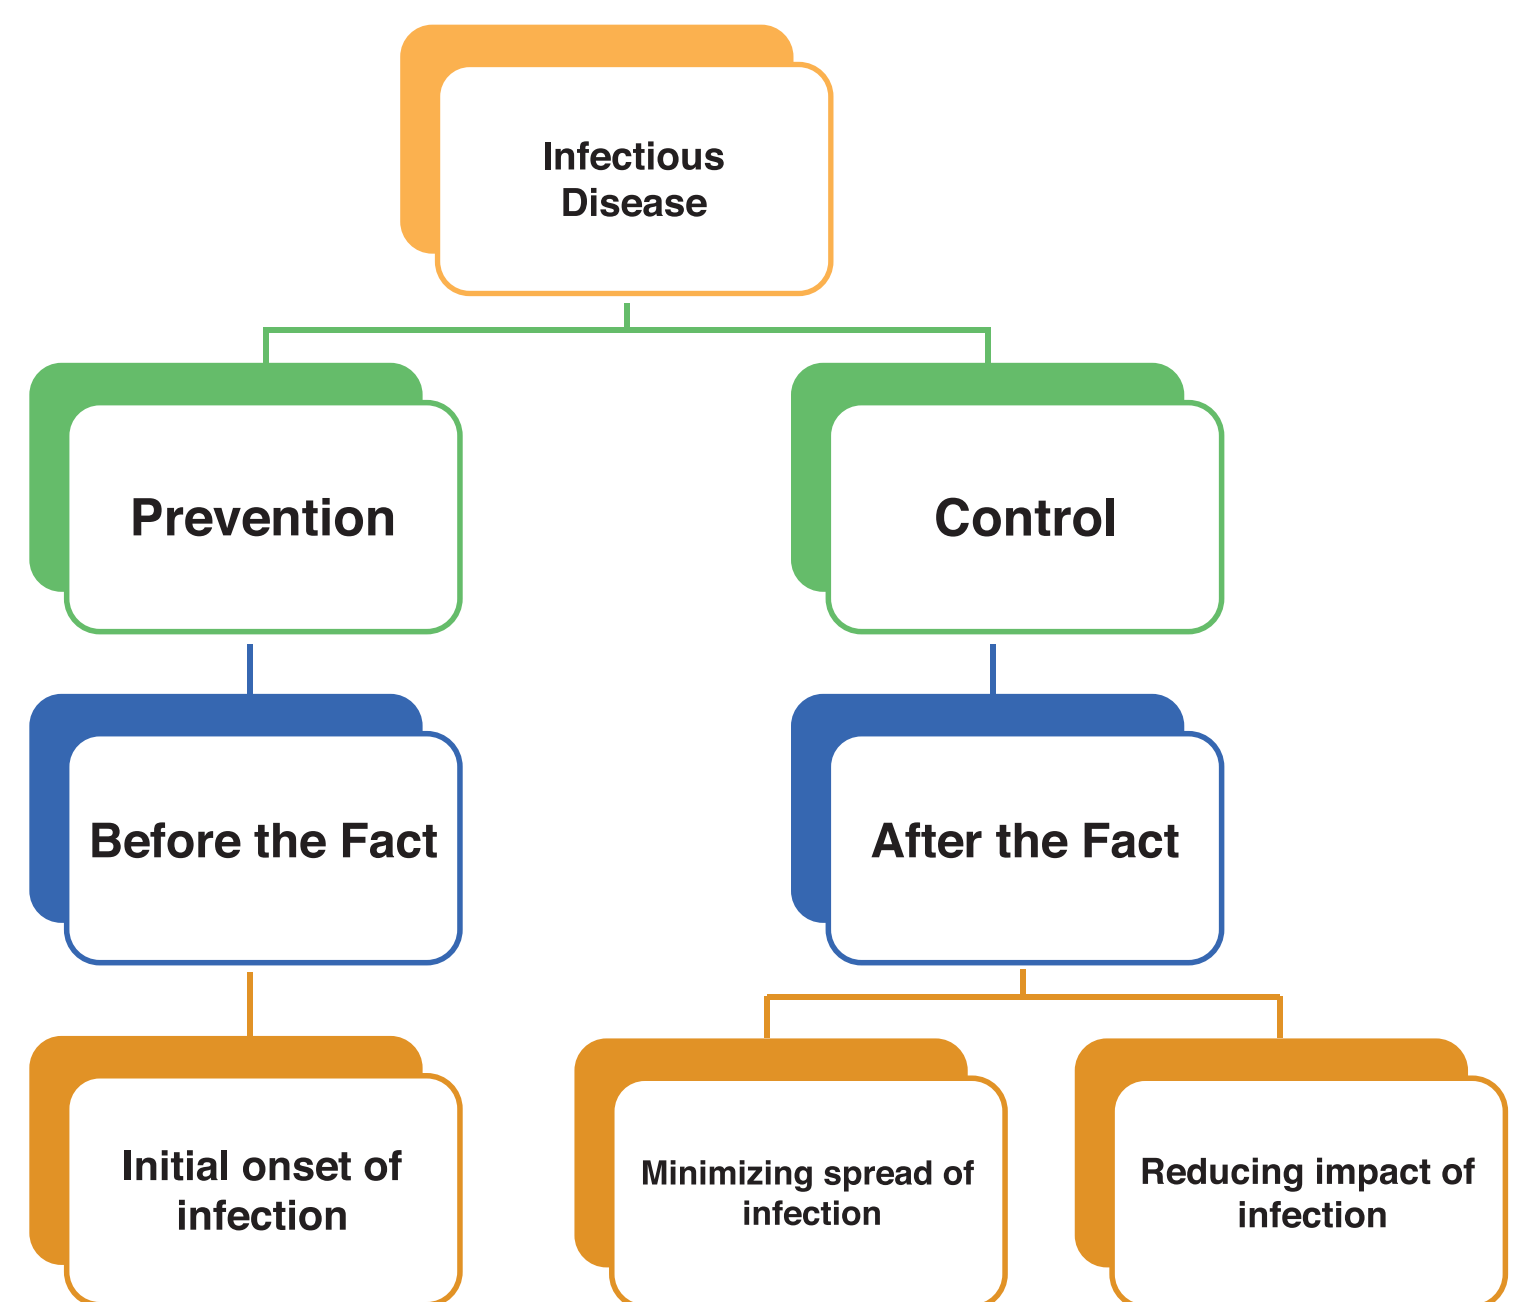

## 1. RISK ASSESSMENT

Employers and Workers should work together to consider the potential exposure to infectious diseases in their workplace by answering

## 2. PREVENTION VS CONTROL

The Risk Assessment should consider how infectious hazards can initially start in the workplace and the impact if it continues to exist in the workplace.

## 3. HIERARCHY OF CONTROLS

A principle commonly used to minimize workers exposure to occupational hazards. Consider the question for each control method.
